

INVESTOR IN PEOPLE

ROBSEAL ROOFING

The Robseal Reception.... where we meet, greet and pass through constantly. The centre of information, gossip and that all important 'office buzz'. " Welcome to Robseal".

## At the leading edge of roofing technology

### Single ply PVC & Built up Felt Systems for New Build & Refurbishment works

Thank you for taking the time to read about our company - where all employees, both on site and office based, are proud of the excellent reputation we have earned since our establishment in 1963. This reputation is built on quality workmanship, longstanding and trusted supplier / client relationships

and a dedication to stay at the forefront of our industry.

With this leaflet we would like to give you a 'whirlwind tour' of our offices and training facilities, which we hope will give you a feel of our operation in anticipation of Robseal providing services for you.

We are a highly energised, vibrant company, eager to prove that our approach to solving roofing problems will encompass the latest technology, backed up by a highly experienced and fully trained workforce, dedicated to providing solutions to fit your precise requirements.

**The Training and Conference Room...** Some of the office staff receiving health and safety awareness training.

This room, which will accommodate 20 persons, is used primarily for training our own staff. Health and Safety at work training is undertaken by our in house IOSH SP qualified safety manager, while NVQ training and assessment is provided by our in house NVQ assessor. As well as servicing our own training needs we also carry out regular CPD seminars on Single Ply and Built up Felt Roofing systems where Surveyors, Architects and Facilities Managers can be kept abreast of new innovations and design techniques, helping them to maintain their professional qualifications.

**Estimating and Design office...** This is our estimating department, all of our offices are fitted out to the same high standards for the efficient delivery of their intended function.

In the estimating and design office the over-riding goal is to :-

- Keep us competitive.
- Develop the correct design to meet all the project requirements.
- To constantly up date our computerised estimating system, thus ensuring speedy delivery of your quotation.
- To assess, with the help of the Contracts Department staff, the performance and confirm the claims made for all new products as they come onto the UK market place.
- To start the ISO9000 quality chain that follows every contract from initial survey through to completed project and guarantee hand over.

**2001 and 2003** Robseal receives awards for quality workmanship from Ian Muddiman Technical Operations Manager of Sarnafil

**2002** Robseal recives award for Investor in People from Sir Micheal Latham, Chairman CITB

This is why our new offices in Reading have been painstakingly chosen and equipped, to service a client base with demanding standards and constantly changing requirements.

But don't take our word for it... our phone number is below, call us and then pay us a visit - the coffee pot is always on and we will be very pleased to welcome you.
